### Introduction

Sport and athletics date back to the earliest written recordings of man's history (Figure 2.1) as does the knowledge of athletic injuries and their care. Writings describing sports injury date back to the book of Genesis 32, and writings describing the use of exercise in a therapeutic manner in the provision of health care for an injured athlete date back to the writings of the Hindus and Chinese around 1000 BC. Throughout the ages, our knowledge and ability to prevent, diagnose, and care for athletic injury and illness have continued to progress. With progress, multiple disciplines of professionals have developed specific bodies of knowledge and expertise aimed at improving our ability to prevent and provide the most appropriate care for the injured athlete. "Sports medicine" is the broad collective term that we utilize today to describe the body of knowledge and application of this knowledge to the injured athlete. While the use of the term "medicine" most often signifies the physicians' contribution, history will show us that much of the care provided to the injured athlete has been rendered not only by physicians but also by a multitude of other professionals.

### 챕터 별로 이동 가능 and "sports therapy"

ation, "sports medicine" may be best defined as the art and science dealing with the maintenance of health and the prevention, alleviation, or cure of disease or injury in the athlete. It includes the study of the management of musculoskeletal injuries and the medical problems encountered by athletes during training and competition and training. Sports medicine also encompasses the study of the physiological and mental change and nutritional requirements placed upon individuals involved in strenuous athletic activity, injury prevention and conditioning strategies, and the rehabilitative process, or "sports therapies" necessary to prevent injury and return athletes to a safe competitive level. "Sports therapy" may be best defined as the art and science of the application of remedial agents or methods to prevent injury and return an injured or ill athlete back to a state of optimal physical condition to return to sport. "Sports medicine" and "sports therapy" incorporates the expertise of exercise physiologists, nutritionists, physical therapists, athletic trainers, massage therapists,
