### COMBINED EXTERNAL BEAM RADIATION THERAPY OR BRACHYTHERAPY AND HORMONES

Joycelyn L. Speight  
Mack Roach III

원문보기

#### INTRODUCTION

The nonsurgical management of prostate cancer has increased dramatically over the last decade. The vast majority of patients managed without surgery receive some form of radiotherapy with or without hormone replacement therapy (HRT). The expanding interest in radiotherapy may arise in part from the fact that long-term survival rates with radiotherapy appear to be equivalent to those achieved with prostatectomy (8,46,48,49,62,88,89). The optimal management of clinically localized prostate cancer is one of the most common, challenging, and controversial areas for patients and physicians. For no other site is there so much disagreement among "experts" as to who should have surgery, radiotherapy, or receive HRT alone or in combination with one of these other modalities. To

# Personal Account - My Projects

The screenshot displays the OvidSP interface. On the left, a sidebar contains 'Results Tools', 'Options', 'Search Information', 'Filter By', and 'My Projects'. The 'My Projects' section is expanded, showing a '+ New Project' button and two existing projects: 'burn surgery' and 'laser surgery'. The main content area shows search results for 'The corner: Clients who inspired you.' by Epston, David, published in the *Journal of Systemic Therapies* in 2011. Below the article title, there are buttons for '+ My Projects' and '+ Annotate'. The top navigation bar includes 'Print', 'Email', 'Export', 'Add to My Projects', and 'Keep Selected'. The 'Add to My Projects' button is highlighted with a red box. The 'View Abstract' link is also visible below the article details.
